Letter

Dear Selection Committee,

Critical Facilities Group, LLC is pleased to submit our qualifications for the SunCore Data Center in Phoenix, AZ. Our firm has built our reputation on hyperscale and enterprise data centers (tier iii/iv), and we are uniquely positioned for this work given our track record of relevant projects, deep specialty subcontractor base, and a project team that has personally delivered comparable scope multiple times.

We have reviewed the RFP requirements and confirm that we meet every mandatory qualification, including bonding, safety performance, and demonstrated experience. We look forward to the opportunity to interview with the selection committee.

Sincerely,

Allison Park, Senior Vice President, Western Region
