Letter

Dear Selection Committee,

Sonoran Industrial Constructors is pleased to submit our qualifications for the SunCore Data Center. While our primary specialty is semiconductor fab support and process manufacturing facilities, we have meaningful experience adjacent to this scope and have invested in growing our capabilities in this market.

Our team brings strong local knowledge, an established subcontractor base in Phoenix, and a competitive bid backed by long-standing trade relationships. We respectfully ask the committee to consider our proposal alongside the specialty firms competing for this work.

Sincerely,

Frank Estrella, President
